Artistry You Can See, Experience You Can Trust

Plastic surgery can enhance, reconstruct, and rejuvenate your entire body...and your self-esteem. Seeking refinements is becoming more commonplace than ever before, but not all procedures—and not all surgeons—are created equal.

“Plastic surgery is an intricate, multidimensional surgical subspecialty,” says Shashi Kusuma, MD, Founder and Medical Director of Suria Plastic Surgery. “For optimal outcomes, it’s essential that the surgeon have knowledge of both the artistic *cosmetic* side of the specialty, as well as the technically challenging *reconstructive* procedures.”

Dr. Kusuma offers wide-ranging cosmetic and reconstructive services to address all needs, though he is particularly passionate about rhinoplasty (nose surgery), eyelid surgery, facial rejuvenation, and aesthetic and reconstructive breast surgery. The key, he notes, is approaching each procedure with comprehensive, artistic, functional, and anatomical perspectives: “If a patient presents for an aesthetic rhinoplasty, for example, I can also address any functional components to help the patient breathe and function better.”

The Journey to Transformation

Plastic surgery can be life changing, Dr. Kusuma reminds: “We’re dealing with people—not just noses or breasts—and these people will experience emotions along with their physical change.”

That’s why Dr. Kusuma conducts multiple consultations with each patient prior to surgery to discuss the goals, expectations, and recovery process associated with the options.

“Plastic surgery is a field that allows a skilled surgeon to combine science with art, technology with technical ability, and passion with creativity.”—Shashi Kusuma, MD

“We take our time,” he notes. “I educate each patient about the treatment process from multiple angles—physiological, aesthetic, emotional. Then I recommend a treatment plan.”

Conservative and minimally invasive approaches are always considered first, and natural outcomes are a top priority: “We try to help patients become the best natural version of themselves, not to look like other people.”

A Doctor for Your Lifetime

With a dizzying array of gimmicks on the market, it can be hard to decipher the best—and safest—route to the results you desire. Instead of quick-fixes and unrealistic promises, Dr. Kusuma relies on facts and scientific data to employ only the most proven techniques and state-of-the-art technology.

“I’m not a one-time doctor, I’m a lifetime doctor,” concludes Dr. Kusuma. “Patients and their families come back to me time and again because we’ve developed a relationship, and they trust my guidance.”

“We can handle almost anything, and patients know we’ll take great care of them.”
